PI SCHOOL
MACHINE INTELLIGENCE
MEETS HUMAN CREATIVITY

We have set an AI lab to work on the most relevant business challenges faced by the industry. Find out why AI is the competitive advantage you are looking for.

WHAT CAN AI DO FOR YOUR COMPANY?

- Improve your customer service with innovative tools such as chatbots or automatic translations' integrations;
- Automate internal processes by developing automatic document classification tools;
- Create effective marketing campaigns with the support of AI automation tools;
- Explore your business data to know your customers better and provide them personalized solutions.

WE HAVE AN AI LAB TO SOLVE YOUR BUSINESS PROBLEMS

At Pi School, we are selecting 15 projects that will be developed by the best pool of engineers.

Becoming a project at Pi School means that you will get a proof of concept or a prototype in only eight weeks, while sponsoring the best international talents.

Implement AI-based solutions within your company and lead the digital transformation process that will make you thrive. Let us guide you in finding the best competitive advantage, improving your services, and reducing the time-to-market of your products.
